

AmberTech Grease Compatibility Chart

Various Greases	AmberTech Grease
Barium Complex	Compatible
Calcium Stearate	Compatible
Calcium 12 Hydroxy	Compatible
Calcium	Compatible
Calcium Complex	Compatible
Aluminum Complex	Compatible
Lithium Stearate	Compatible
Lithium	Compatible
Lithium 12 Hydroxy	Compatible
Lithium Complex	Compatible
Clay	Incompatible
Polymer	Compatible
Polyurea Conventional	Compatible
Polyurea Shear Stable	Compatible
Urea	Compatible
Sodium	Incompatible

The only reason to purge or push out any existing grease in applications when introducing AmberTech Grease is to allow the M99 within the grease to react to the metal surface causing MSM, Molecular Surface Modification.
